Abdelghny Orogat (COMP3005A - Database Management Systems)

Instructor: Abdelghny Orogat
COMP3005A - Database Management Systems

Comment #1:
You put a lot of effort into the class and I appreciate that (unlike most comp sci instructors...)

Comment #2:
Great course, very well taught. My personal preference would be for the project to be weighted less
but that is just a preference since I prefer tests.

Comment #3:
Abdelghny has the better teaching ability out of the two instructors teaching COMP3005.
Homeworks and assignments are easy to complete

Comment #4:
Enjoyed your presentations. Thank you

Comment #5:
The homework really aided in my understanding and engagement in this class and your lectures
were really helpful and clear! Have a great summer!

Comment #6:
I genuinely enjoyed taking this course with this professor. His way of teaching was succinct and
clear. He was also constantly improving the way he was teaching the material and trying to make

the material more engaging for us by asking for student feedback(which I believe was very helpful).

Comment #7:
The teacher is very knowledgeable on the course. He explains the content very clearly and straight
forward. He tries his best to help students. I wish him the best of luck on his PhD.

Comment #8:
I found the lectures engaging, clear, and informative.
One thing I would add that came to mind is the use of having a Zoom option during the in-person
lectures as it adds an option to accessibility. This can be helpful to those who live quite far away or
for those who would like to attend the lecture but for personal reasons cannot attend it live.
Overall, I found this portion of the course manageable.
